Unmatched Security For Doors & Windows

Screened porches

4Ever Door screens allow you to keep or enhance your lifestyle. Because you can leave your regular doors and windows open and enjoy the fresh air all you're around without compromising your security.

Our doors and window come in many different frame styles and a full range of standard colors, to match your home or business.

Visibility through 4Ever Door stainless steel mesh is unhindered. It's a mosquito and fly screen as well as a security screen.

We also have a range of products designed to let you escape quickly from the inside of your home if needed in an emergency situation.

Although our keyless exit system for windows is effortless to open from the inside, they also feature 4Ever Door's screw-clamp system plus a triple burglar resistant system. This system makes them just as hard to penetrate from the outside as all our other products.

Our patio enclosures allow you to secure an exterior area from burglars and mosquitoes.

“SECURITY”

This seems to be a word we hear on a regular basis today, The security of our homes and families is a top priority because of the violence associated with home invasions today. At 4EverDoor we can help put your mind at ease by providing real security against burglars, vandals and severe storms by installing your choice of the many series of security screen options.

We truly believe that you will be hard pressed to find anyone, anywhere who puts as much heart and soul and attention into the detail of a product as we do. It's the proven and tested experience that matters and truly makes the difference between a poor investment into a “counterfeit imitation” or a wise investment into a truly great product that will last a life time, with three decades of technology and state certified testing put in to it, we offer something that you are proud to have on your home and will keep you safe 24 hours a day for a lifetime.

What exactly is a security screen?

- We have been asked this on more than one occasion. Let me first clarify that security screens are NOT security bars, our screens have proven to be much safer than “security bars” and any other product in the nation. 4EverDoor is the only company who can offer the unmatched “original” and authentic stainless steel security screens that are famous for the harshest and most brutal testing in the nation against home intrusions. 4EverDoor screens also feature our keyless exit system which is simple to use for children and the elderly, if needed.
 - The benefits and advantages that we offer every client is unmatched on every level in the hand craftsmanship of our professionally designed security screens, The option for colors and our coating process is state of the art with a 15 year warranty on everything we do, there's no color scheme that we can't replicate.
 - Counterfeit imitations and typical window screens are hand stretched and attached with home made fasteners that DO NOT offer the proven & tested requirements needed to with stand a violent intruder, other imitations also have a single locking device at some point of the window screen, providing limited security at best, this creates a serious problem when keeping intruders out of your home, regardless of your age, this problem can be life threatening during an attack of a would be criminal.
 - The keyless emergency exit system is designed to eliminate this problem, 4EverDoor security screens offer the only patented locking system on the market anywhere that insures complete security with easy escape if needed.
 - 4EverDoor security screens are made of heavy extruded aluminum frames, that are heavily reinforced at strategic places to give unmatched maximum strength.
 - We offer a 12 x 12 stainless steel .035 wire mesh in all our screens, allowing the home owner or business to mount the screens directly to the window. By doing this our screens will not take away the cosmetic appearance the home owner or business desires, and doing it at an affordable price.
- 4EverDoor security screens protects your windows from vandals, burglars, extreme storm damage, while keeping out unwanted pest like misquitos, flies year round, 24 hours a day with the ability to see out at all times with the option of fresh air at the times when needed.

Why 4EverDoor beats more burglars:

1. We Screw-Clamp our mesh to give it enormous strength under attack

Only 4EverDoor screw-clamps security mesh to the frame with tamper-resistant screws that go right through a metal clamp, through the mesh and into the frame. This gets repeated every 125mm around the frame.

The screw-clamp hooks into the aluminum frame and with its lever action creates a "single frame member" effect, meaning impacts are absorbed by spreading the load around the whole frame. And when screwed down, special teeth in the screw-clamp and frame "bite down" on the profile of the mesh to grip it tightly (See diagram opposite).

This result gives 4EverDoor Screens enormous strength against break-in attempts.

Stainless mesh screwed into frame

2. Our 304 Security mesh is 26.5% thicker, so it's harder to break or cut

At 0.9mm in diameter, 4EverDoor tensile stainless steel security mesh is up to 26.5 % cross sectional thicker than any other stainless steel mesh product on the market today, making it stronger and harder to cut or penetrate.

4EverDoor developed our tensile mesh specifically for use as a security screen product that would also be an effective insect screen and look great both inside and out. Made from 304 grade stainless steel wire, it has a special high tensile and elongation factor which give it strength and the ability to be woven into a very tight aesthetically pleasing mesh.

4EverDoor's tensile mesh has a Category 4 Cyclone Missile and Ballistics rating - a proven strength advantage over other steel mesh products.

Made from a high grade stainless steel, our tensile mesh also resists corrosion in coastal areas and harsh environments.

Thicker, stronger stainless steel mesh

3. Mid-rails come as a standard option to make our doors even stronger

Although all 4EverDoor doors can be made without mid-rails, a mid-rails gives you these five great benefits:

1. It stiffens a door or enclosure, to resist attack
2. It strengthens the door lock to be tamper resistant from intruders
3. It protects the hinges on a door by reducing a criminals ability to lever the door from the wall.
4. It acts as visual warning to prevent you from walking through and apparently open space.
5. It can become an architectural feature to give your screens and doors more flexibility in design.

Mid-rails for extra strength, security and safety
